

Andrew Jones
For Harrison Assessments Int'l Limited

Completed: 12/04/2008

Welcome to the Harrison Assessment Career Guide! The Harrison Assessment Career Guide is a valuable tool for starting, changing, or developing your career. It measures more than 200 factors including your task preferences, motivations, work environment preferences, interests, and interpersonal preferences, The system has compared your preferences to the requirements of more than 600 careers and determined your most suitable careers. Please note this is not an assessment of your education, experience, or ability to perform specific tasks. You will need to consider these things separately.

The suitability assessment includes a technological 'consistency detector' that indicates the reliability of results by analyzing the consistency of the answers on the questionnaire. Andrew's consistency score is 96 which indicates that Andrew is 99% consistent in answering the questionnaire. This indicates a high likelihood that Andrew was truthful, accurately self-aware, and able to concentrate on the questionnaire.

Your careers are listed in order of suitability. The suitability scores are to the right of each career. The highest possible suitability score is 100. The higher the suitability score, the more likely you are suitable for that career. A score of 80 or greater indicates the career matches your preferences, but it does not necessarily mean you should pursue that career. There may be other factors such as education, training, or specific aspects of the career you may dislike.

A career decision is one of the most important decisions of your life. Therefore, it is important to take your time and explore the valuable information you can obtain from the HA system. Circle the suitable careers you would like to explore further. Then request a 'Career Comparison' report to see the specific details of your preferences related to the specific requirements of possible careers. This will enable you to see which specific aspects of a career will be fulfilling or unfulfilling. You can also look up the careers on the web or find a career counselor or school counselor to provide you with more information about that career. You could also contact professional organizations related to the career or call employers who advertise for openings related to this career. For further information about salaries, availability, training and career descriptions, see the United States Government publication of the Occupational Outlook Handbook online at http://stats.bls.gov/oco/ocoiab.htm, or you can explore the home site on http://stats.bls.gov. You can also find the Occupational Outlook Handbook at your local library.
